

## Floor and Surface Cleaning

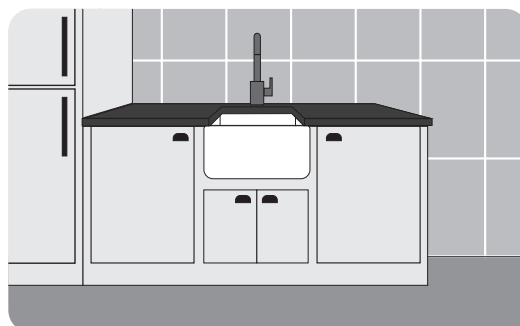

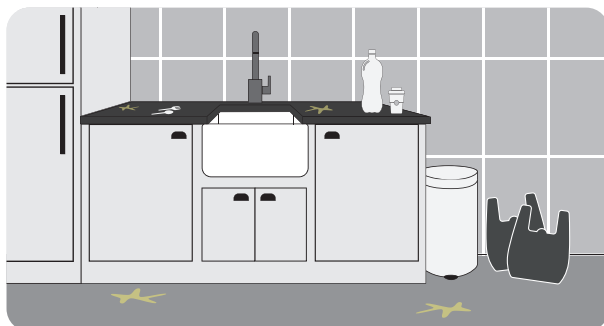

with

### Quick Reference Guide (refer to product SDS before use)

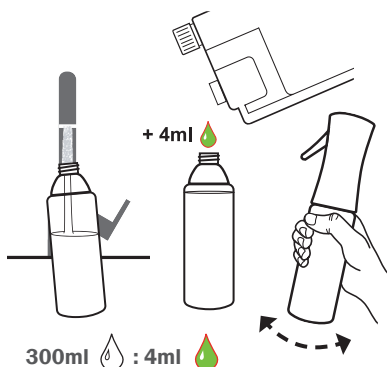

- 1.** Remove any objects, debris and heavy soiling from floor and surfaces.

- 2.** Pour the appropriate volume of **TECcare® ECO-DET** Concentrate into the corresponding volume of clean water (see Dilution Rates).

e.g. fill 300ml refillable sprayer bottle with clean water. Add 4ml\* **TECcare ECO-DET Concentrate**. Replace sprayer cap and shake bottle to mix.

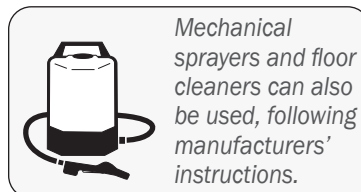

ROUTINE CLEANING  
1L : 10ml  
HEAVY-DUTY CLEANING  
1L : 33ml

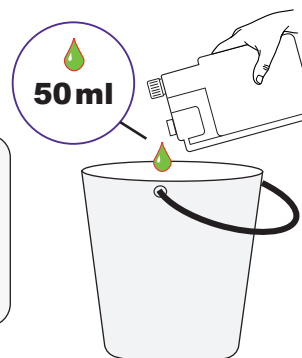

#### Dilution Rates

|                     |               |                                  |
|---------------------|---------------|----------------------------------|
| Routine cleaning    | 1 litre water | 10ml TECcare ECO-DET Concentrate |
| Heavy-duty cleaning | 1 litre water | 33ml TECcare ECO-DET Concentrate |

e.g. fill a 5 litre bucket with clean water. Add 50ml\* **TECcare ECO-DET Concentrate**.

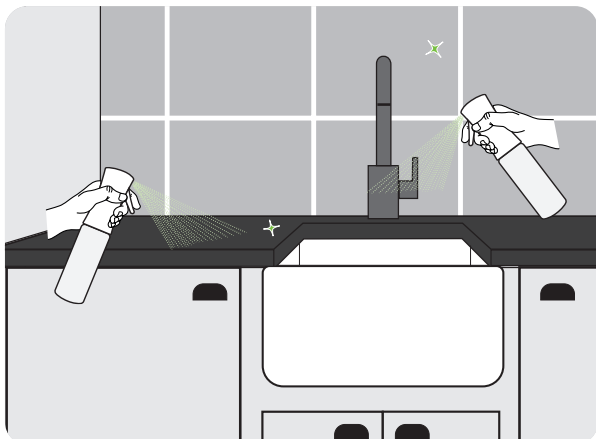

*Mechanical sprayers and floor cleaners can also be used, following manufacturers' instructions.*

\* Examples illustrate dilutions for routine cleaning.

- 3.** Spray diluted **TECcare ECO-DET** onto surfaces, using a disposable cloth to wipe surfaces if required. Allow to air dry.

- 4.** For larger areas diluted **TECcare ECO-DET** can be used in a bucket with a disposable mop. Allow to air dry. Change solution when it becomes dirty.
